Update on Newsletter

Hi to all friends and clients this is our 4th newsletter of 2007. The newsletter is limited to one page and only produced if we have news that may benefit our friends and clients. We will continue to email newsletters for 2007. However we encourage you to start using our new website www.tnlc.com.au to access our newsletters and other information.

RTO Developments

We at Thrivability Training and Coaching are in the process of updating our FLM resources to the requirements of the BSB07 Business Services training package.

We have just completed development of all resource materials for the Certificate IV and Diploma of Project Management. As with all our offerings we have a mining focus to our project management.

We are also developing resource materials for two advanced diploma level units, based on client request. They are:

MNMMSM628A Establish ground control and slope stability systems.

MNMMSM621A Establish mine water management system.

Cover Story *Cert IV in Metalliferous Mining*

The Certificate IV in Metalliferous Mining Operations (Open Cut) has finally made it. In newsletter #7 Thrivability mentioned that contractors are the main takers for the Cert IV MNM for team leaders and supervisors, while this is still true the large mining companies have seen the light. TNLC Thrivability have recently completed a skill assessment process after a program of eleven days of training over a four month period, for a major mining company. In total 14 Cert IV MNM and five Dip MNM participants were involved. Some testimonials about how the training has improved participants performance at work are listed:

- "The training has given me a better understanding of management styles and information required!" ...foreman
- "Very helpful in my day to day work" ...supervisor
- "Understanding my duties and responsibility eg geo-tech subject, mining law and regs" ...superintendent
- "It has given me more knowledge about other areas of the mine eg water plans" ...foreman

Feedback to date indicates that all candidates are very satisfied with the RTOs performance. With the gradual addition to staff numbers (now up to 3.5 professionals) Thrivability Training and Coaching are now capable of undertaking larger and longer term projects and training programs, as demonstrated above. Please follow our progress on our website www.tnlc.com.au

Thrivability Update

S44 Appointed Persons Training is alive and well with three new customers signing on since the last newsletter.
